Booth# 207

US Flood Control (USFC) is the world leader in emergency flood control and environmental protection; it is their intention to do away with sandbags and replace them with their safe, and environmentally friendly, flood protection system.

USFC's affordable and easy to use system is comprised of a series of engineered interlocking flexible tubes that are inflated with water to form a temporary dam. The tubes are reusable and are constructed from an extremely rugged material. The dams may be configured to control floods of varying depths by stacking and joining the segments in a pyramid shape. Also, the segments can be linked together seamlessly to form any length of dam required.

Booth# 107

USDA's Food and Nutrition Service (FNS) provides food assistance to those in need in areas affected by a disaster. This Federal assistance is in addition to that provided by State and local governments. FNS (1) provides commodities to State agencies for distribution to shelters and other mass feeding sites or directly to households in need in certain limited situations and (2) authorizes State agencies to issue disaster food stamp benefits to low-income persons with disaster-related expenses or income losses. Food assistance is an immediate need and is typically one of the first types of aid provided to disaster victims. As a part of Emergency Support Function #11- Agriculture and Natural Resources, FNS coordinates response efforts for provision of federal food assistance and plays an important supporting role in response efforts involving Emergency Support Function #6 – Mass Care, Emergency Assistance, Housing, and Human Services.
